ANTHONY DEI MEDICI

Web developer

ABOUT ME

I discovered web developing driven by curiosity and I find out a new passion.
Actually, I am working as web developer for NTTData and as freelancer for little projects. I am also still studying on Start2Impact in order to improve my abilities and knowledge about web and blockchain developing.

WHY BLOCKCHAIN & WEB DEVELOPING

Since I was a child I always loved riddles. And, for me, programming is like having a big riddle to solve.
I believe that finding problems is the fun part of this job!
I also truly believe that technology will contribute more and more to improve our quality of life and the way we live it.
I want to give my contribute in this technology evolution!

PORTFOLIO

Thanks to Start2Impact courses, I have had the opportunity to create **3 practical projects** by myself, **receiveing feedbacks from experts** in this sector.
I was able then to create a portfolio to demonstrate my skills.

The expert who revised my projects
Dario Moceri
Full-stack developer for BitFinex, Blockchain expert and start-up technical consulent.

My last projects

'TicTacToe'
A simple
TicTacToe game
made with Vue

'Art Secure'
Write your
thoughts on the
blockchain

BTC/USD
Last price: 59955.3351$

'DJongo-Trade'
My simple
trading
platform

TICTACTOE

Let's play TicTacToe!

I made this simple app to test my front-end skills in VueJS & Javascript.

Deployed on Netlify as static site, I tried to make it simple but at the same time trying to add some features like a simple bot as a player and different grid sizes.

TOOLS USED

- HTML
- CSS / SCSS
- Javascript
- VueJS
- Framework: Vue-Cli

Quokka   Potato

ART SECURE

**Keep your thoughts in a safe place with ArtSecure!**

This simple site want to demonstrate how plagiarism can be easily prevented by publishing any personal script on the blockchain.

In fact, blockchain technology lets you have an eternal inhackerable proof (timestamp) of every message added in this worldwide distributed ledger.

TOOLS USED

- Python
- DJango
- HTML5
- CSS
- NoSQL: Redis
- SQL: SQLite 3
- Materialized CSS

AUTHOR: HERMANNE

Perché ti amo

Perché ti amo, di notte son venuto da te così impetuoso e titubante e tu non mi potrai più dimenticare l'anima tua son venuto a rubare. Ora lei è mia - del tutto mi appartiene nel male e nel bene, dal mio impetuoso e ardito amare nessun angelo ti potrà salvare.

AUTHOR: JOSÉ

Coltivo una rosa bianca

Coltivo una rosa bianca, in luglio come in gennaio, per l'amico sincero che mi porge la sua mano franca. E per il crudele che mi strappa il cuore con cui vivo, né il cardo né ortica coltivo: coltivo la rosa bianca.

●●●

DJONGO TRADE

A simple trading platform!

In this project I try to create a simple application for buying and selling bitcoins between the users registered to this platform.

By using CoinMarketCap API, users have also access to the bitcoin price from one of the most famous Crypto-exchange in the world, in real time.

🎯 TOOLS USED

- **Python**
- **DJango**
- **HTML5**
- **CSS**
- **NoSQL: MongoDB**
- **Materialized CSS**

Marketplace
